

## Rubber Playground Tiles

Rubber Playground Tiles are an excellent way to beautify any playground area while providing certified, fall protection for children while playing on slides, swings and other playground equipment.

- QuadBlock interlocking connectors are the perfect alternative to labor intensive pour-in-place and glue-down systems. Available for 2-1/2" tiles, QuadBlock modular connectors feature precisely located openings that lock into the bottom corner of each tile to securely fasten these playground tiles together. The connectors are quick and easy to use and they allow the removal or replacement of individual tiles with minimal disruption and labor, especially on rooftops, where water drainage is necessary.
- Our certified FallSafe(R) rubber playground flooring is both CPSC Compliant as well as ASTM F1292-04 compliant.
- With over twenty colors and two thicknesses available, these rubber playground tiles are able to visually enhance any playground area while increasing safety for all children.
- Not only are custom colors attainable with this rubber playground flooring by combining our 37 primary color granules, but custom logo designs are also available and can range from one single tile to entire playground areas.
- These heavy-duty rubber playground tiles are made from recycled rubber tires and carry a 15 year warranty.
- 2' x 2' Standard Color and 95% Color Tiles are 2.50" thick while the 2' x 2' Solid Black, 10% Color and 35% Color Tiles come 1" thick.
- Beveled Edging, inside and outside corners and ADA ramps are also available to finish off any playground flooring installation.

Item No: GRPT
